

THE GDPR COMPLIANCE DEADLINE IS MAY 2018

Are you ready?

Time is now of the essence for all UK Public Sector bodies, as the clock is ticking for GDPR compliance.

Ignoring GDPR is not an option, as any GDPR non-compliant body could face fines of up to 4% percent of their global turnover, or €uro 20m, whichever is the greater.

Can you meet these GDPR Article 32 requirements?

- The ability to ensure the ongoing confidentiality, integrity, availability and resilience of processing systems and services
- The pseudonymization and encryption of personal data
- The ability to restore availability and access to personal data in a timely manner in the event of a physical or technical incident
- A process for regularly testing, assessing and evaluating the effectiveness of technical and organizational measures for ensuring the security of the processing

And for all those highly technical GDPR requirements, it's essential to partner with a reputable hosting company with all the experience you need.

Remember, all data must be processed “in a manner that ensures appropriate security of the personal data, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures”.

And the users right to data portability means individuals have the right to obtain and reuse their personal data for their own purposes - across different services, allowing them to move, copy or transfer personal data easily from one IT environment to another in a safe and secure way, without any hindrance to usability.

The BNS Payments GDPR Compliant Hosting Solution

The BNS Payments GDPR Compliant Hosting Solution is located in our Tier 4 state of the art Data Centres

- Our GDPR Compliant Hosting Solution is as flexible as you need it to be
- Talk to us about your needs and we will deliver the most appropriate compliant solution tailor made for you
