# The BNS Payments Hosting Solution

The BNS Payments Hosting Solution is located in our Tier 4 state of the art Data Centre in Milton Keynes

- Our Hosting Solution is as flexible as you need it to be
- You can supply us with your own server (colocation), we provide secure rack space, high performance connectivity and redundant power
- Or we can purchase the server(s) and host on your behalf, so you can get on with running your business
- We will help get you “up and running” with the exact hosting solution you require – from 1u to multi rack
- This means that you can be sure you are dealing direct with a company who supplies the whole service
- We aim to be flexible and try to accommodate any special requirements you may have

## PCI DSS Consultancy Solution

BNS Payments is a level 1 PCI DSS payment gateway and has been since 2006. If you require any help with achieving your own PCI DSS status, or wish to ensure you are compliant, then do give us a call.

We can provide a full end to end PCI Consultancy Solution, which includes the following:

- Initial assessment
- Evaluation of existing payment solutions
- End to end payment gateway – Our hosted solution takes the worry (and cost!) out of compliancy, allowing you to get on with the job
